Order No. P300 0102 00

## USER GUIDE

Thank you for purchasing the Primacoustic VoxGuard DT! The VoxGuard DT is a free standing desktop acoustic baffle lined with sound absorbing foam that substantially improves the recorded sound of desktop microphones. The VoxGuard works by limiting the amount of room echo and noise that reaches the microphone.

Please take a few minutes to read through this user guide. Please refer to [www.primacoustic.com](http://www.primacoustic.com) for various placement options, benefits, and general room acoustic information. Should you have any questions or comments, we invite you to send us an email at [info@primacoustic.com](mailto:info@primacoustic.com).

### HOW TO USE

Place the VoxGuard DT on a desk surface. It's a good idea to face the VoxGuard DT away from noise sources like computers so the rigid baffle can block the noise from entering the mic. Place your mic inside the VoxGuard DT and pass the cable through the bottom cable port. You can mount a clip-on webcam at the top edge to easily include video while recording.

For the best sound when recording spoken word ensure the voice talent is between 12~18 inches (300~450mm) from the mic. This will produce a full frequency response with good bass response. If the voice sounds too thin try moving the voice talent closer to the microphone.

Microphone and computer not included.
