

Contour

EcoScapes Carved Panels are wall-mounted acoustic treatments that enable the creation of striking designs and patterns while reducing echoes and unwanted reflections in a space. Carved Panels are available in a range of designs, but can also be custom-carved with virtually any bespoke design or pattern. Custom sizes and configurations are also available upon request.

Construction

Materials: Heat-bonded PET fibres

Recyclable: Panel constructed with 50-75% post-consumer PET. 100% recyclable.

No VOCs, No binders, No Formaldehyde. Odourless, Non-allergenic and Non-irritant. Does not shed. Safe to handle without protective equipment.

Available Options

Dimensions

Width:	Height:
48" (1,219mm)	11.8" (300mm)
72" (1,829mm)	15.7" (400mm)
96" (2,438mm)	

Custom shapes also available

Edge Type

 Beveled Edge

Thickness

1" (25mm)

Available Finishes

Further custom thickness and finish options may be available.
Contact your Primacoustic sales representative to discuss your requirements.

Testing

Sound Absorption

EcoScapes Contour carved panels are designed to equal or exceed the acoustic performance of competing products. Exact NRC values will vary depending on the chosen specifications and suspension conditions of your baffles. Contact your Primacoustic sales representative for more details.

Fire Safety

ASTM E84 - Class A
EN 13501 - Class B

Accolades

50-75% recycled content

Will contribute to meeting LEED standards.

Installation and Maintenance

Suggested tools: Utility Knife, Circular Saw/Band Saw, Straight Edge Guide, Measuring Tape

Method

Mounting to Wall:

Construction adhesive (permanent) or silicone adhesive (semi-permanent) is recommended.

Mounting onto furring strips will improve sound absorption.

Suspending from Ceiling:

Although primarily intended for wall-mounted applications, Carved Panels may also be deployed as hanging clouds, affixed directly to a ceiling, or used as baffles or dividers. (*hardware sold separately*).

PET panels can be cut to size with a utility knife or circular/band saw, to fit tight spaces or to further customize your project.

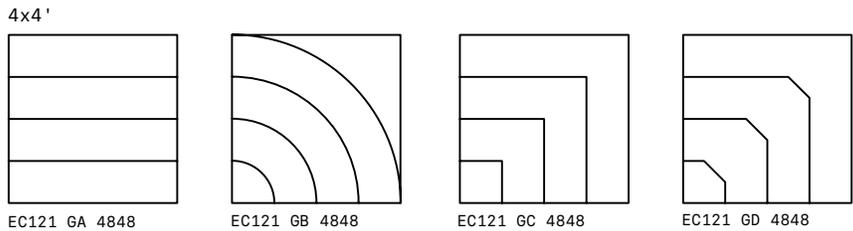

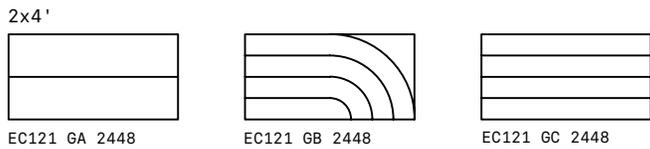

Maintenance

EcoScapes panels are easy to clean and take care of. PET should not shed or break down over time. Surface dirt and dust can be removed with a duster or vacuum cleaner without damaging the panel, while carpet or upholstery shampoo should remove most stains.

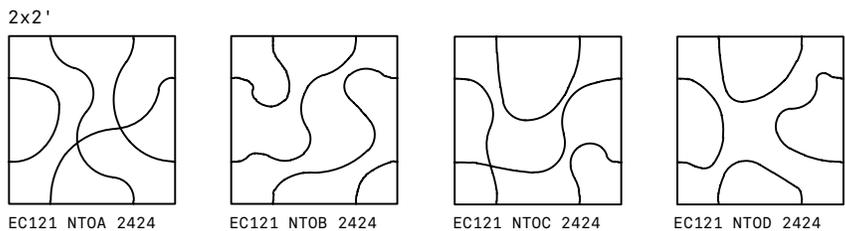

Example Designs

Below are a few example designs that show what is possible with Contour carved acoustic panels. The modular, mix-and-match designs allow for endless design possibilities by themselves, but you're not limited to just these - almost any design you can imagine is possible.
