

LONDON 12 ROOM KIT

The London 12™ room kit is designed for rooms up to 150 sq ft (13.9 sq m), or can be combined with other products to treat larger spaces. Ideally suited for studio control rooms and home theaters, this easy to use kit is a single box acoustic treatment solution.

The London 12 contains Broadway panels that tackle problems that affect any room such as primary reflections, flutter echo, standing waves and excessive bass. In addition to acoustic panels, each London 12 room kit includes the corresponding mounting hardware and instructions for easy installation.

Broadway panels are made from high-density 6lb per cubic foot glass wool, offering nearly five times greater absorption than typical low cost foam alternatives. This means that you get more absorption with fewer panels, while assuring an even absorption curve throughout the frequency range. The London 12 room kit is available in black, beige or grey fabric or in Absolute White™ paintable finish. 22 panels included.
