

# TelaWall - Fabric Track System

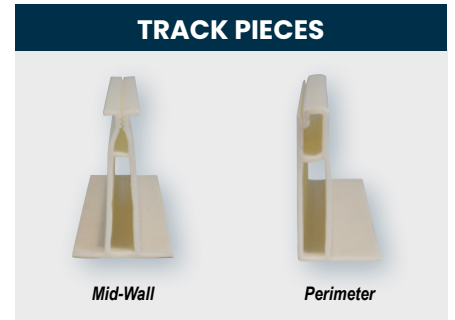

## ENGINEERING DATA SHEET

The TelaWall fabric track system includes two types of track pieces: perimeter tracks for outside edges and mid-wall tracks to join two sections of paneling together. Both of these track types accommodate acoustic fabric and 1" or 2" thick acoustic panels to allow for acoustic absorption throughout the frequency spectrum, not just in the vocal range. Primacoustic fabric track is built from durable and recyclable PVC that can be cut to size if needed, with standard lengths of 4' per track. Two color options are available; a neutral tone or a black finish.

### TRACK PIECES

Mid-Wall

Perimeter

### TELAWALL FABRIC TRACK

PART #	LENGTH	THICKNESS	COLOR	EDGE	TYPE	BOX QTY
T102 1048 09	4' (48")	2"	Neutral	Square	Perimeter, Top Load	16
T102 1048 00	4' (48")	2"	Black	Square	Perimeter, Top Load	16
T202 1048 09	4' (48")	2"	Neutral	Square	Mid-Wall, Top Load	10
T202 1048 00	4' (48")	2"	Black	Square	Mid-Wall, Top Load	10

### TOOLS REQUIRED

- Utility Knife
- Scissors
- Sandpaper
- Primacoustic Tucking Tools
- Miter Saw
- Stapler
