

# TriPad™ mic stand isolator

## USER GUIDE

Congratulations on your purchase of the TriPad! The TriPad provides effective isolation of structure-borne vibration from coupling through the mic stand into the microphone.

This helps eliminate low frequency noise such as foot-steps, street noise, and resonance from nearby amplifiers or drums from entering the microphone. This lets you record at full bandwidth without having to limit the low-end frequency response with an EQ or high-pass filter.

Using the TriPad is easy: Simply slip each Tripad Isolator over the legs of your tripod mic stand. Position the mic stands rubber foot towards the angled cut-off section of the TriPad and you are set to go. Once applied, the TriPad holds in place allowing the stand to be lifted and moved without repositioning.
